

Computer Science Club

University of Pittsburgh

Corporate Sponsorship Information Packet

Foreword

On behalf of 100+ of our active members, thank you so much for considering to support Pitt CSC for the 2019-2020 school year.

Computer Science Club was founded in 2014 with the express purpose of bringing motivated students interested in computer science together to create a special community unseen before at the University of Pittsburgh. Since then, it has evolved into the largest computer science-related organization on campus and has seen its members go on and join some of the top companies, research labs, and universities in the world.

We aren't a national branch or backed by an external organization. While this outside support would certainly be nice to have, the lack thereof has ensured that the growth of our club has stayed true to our roots and ensured that our club members are among the finest and most motivated computer science students you'll encounter at Pitt. We take pride in being an organization driven purely by passion for computer science and our community.

Every year, our club takes on new challenges and uses prior experiences to make the next events even better. This year, we're aiming to tackle a bigger problem that's been hindering us for years - lack of corporate sponsorship.

Through monetary and/or personal involvement from corporate sponsors like you, Pitt CSC can continue to improve and grow much faster. Your support will go towards activities such as our high school CS education program in the Pittsburgh area, our introductory software engineering workshops, our involvement in *SteelHacks* (the largest hackathon on Pitt's campus), and so much more, as you'll see in this packet.

Throughout this packet, you'll find plenty of information about the CSC, what we do, and ways to get involved. Please feel free to reach out with any questions, and again, thank you for your interest in supporting the Pitt Computer Science Club.

Sincerely,
Rohit Ganguly
Computer Science '21
President, 2018-2019 and 2019-2020

About Pitt CSC

Mission Statement

"Pitt CSC exists as tool to build a community of students interested in Computer Science, regardless of declared major. It is intended to be an inclusive and welcoming community of students to develop professionally, engage with each other socially, and explore the field of Computer Science intellectually."

Club Pillars

Pitt CSC has 3 pillars that define the purpose of club activity.

- **Community**
 - The CSC's primary focus is on the various communities that it is a part of. Through events such as socials, outreach events, and mentorship activities, the CSC aims to create an inclusive and diverse space for all individuals interested in computer science.
- **Education**
 - The education of our members is incredibly important to the CSC. We serve as an extension of a college education, inviting esteemed members of the computer science community as speakers regularly. We also run workshops on important concepts in software engineering such as version control and frameworks in order to better educate our members on different technologies.
- **Professional Development**
 - Lastly, our club values the professional development of our members very highly. Through programs such as resume reviews, mock interviews, coding tests, and LinkedIn workshops, our members enter the job hunt well prepared as competitive candidates for a career in the industry or academia.

Club Initiatives

Pitt CSC has three current club initiatives: club projects, outreach events, and club mentorship.

Club Projects

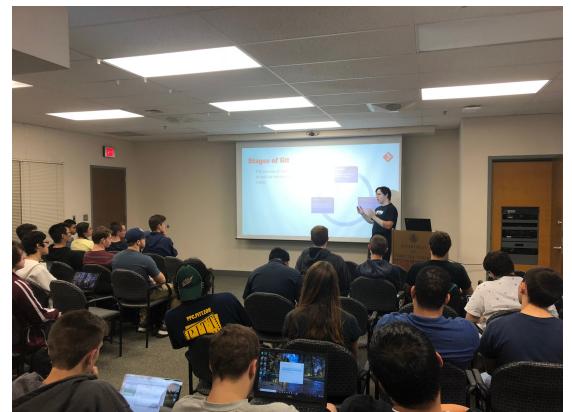

- The CSC's original purpose was to be a student organization almost entirely dedicated towards side projects. While this is no longer our main priority, we've continued the tradition of having club coding projects through our existence. Our most popular project is the Pitt API, an open data source for University Information such as bus routes, classes, laundry data, and dining location hours. We plan out budgets for projects including server hosting costs, hardware costs, and more.

Outreach Events

The CSC's latest and greatest initiative, our Outreach initiative is our way of being active members of the communities in our University and in Pittsburgh as a whole.

Examples of outreach events include High School education programs/hackathons, events with Code and Supply (the largest network of tech professionals in Pittsburgh), and events hosted with Pitt WiCS (Women in Computer Science).

Club Mentorship

- Introduced last year, our Club Mentorship initiative was an initiative started to help new members of CSC feel at home and welcome. It's allowed new members of CSC to make valuable mentors and network connections with upperclassmen who can advise them during their time at Pitt.

Club Events

Professional Development

Every year, we hold events such as resume reviews, interview practice, LinkedIn reviews, and more in order to adequately prepare our members professionally.

SteelHacks

Pitt Computer Science Club members and officers help plan SteelHacks, the University of Pittsburgh's oldest and largest MLH-certified hackathon.

Speakers

Pitt CSC often brings in speakers from both industry and academia such as professors, managers, recruiters, and engineers to come deliver presentations that cover all aspects of computer science and software engineering.

Sponsored/Community Events

We host events with different organizations such as site visits, tours, recruiting events, information sessions, and so much more. These events are also coordinated frequently with WiCS (Women in Computer Science).

Pitt CSC Sponsorship Tiers

The Computer Science Club would like to recognize organizations that make a significant contribution to the development of computer science students at the University of Pittsburgh. **Each sponsorship tier has all of the benefits of the tier(s) below it.** Sponsorship amounts are negotiable between tiers depending on benefits given.

Platinum (Hopper) Tier \$1,000

- Private CSC Networking/Recruiting Events (up to 2)
- Access to Pitt CSC Resume Book
- 2 custom emails to Pitt CSC Mailing List (1000+ recipients)
- Priority (largest) logo space on **ALL** CSC related media + clothing + information

Gold (Turing) Tier \$500

- Direct Company Access to #jobs in the Pitt CSC Slack Channel (800+ members)
- Logo also displayed on CSC Flyers and Emails (over 1,000 recipients) with custom message (240 character limit) and 1/2 priority-sized logos on Pitt CSC clothing

Silver (Lovelace) Tier \$250

- Invitation to speak/present for an entire general body meeting
- Logo displayed on CSC Website, YouTube, Instagram, Closing Slides of meetings

- President - Rohit Ganguly
- Vice President - Mathew Varughese
- Business Manager - Alex Zharichenko
- Event Coordinator - Zhengming Wang
- Outreach Coordinator - Hayden Stec

Closing Notes

Thank you so much in advance for your support to Pitt CSC. Along with the ever-growing size of our club, our operational costs such as travel for events, food/supplies, server hosting, hardware costs, flyers, lesson materials, and so much more grow as well.

Additionally, your sponsorship will help with our initiatives such as our community outreach and coding projects for our club. By making a donation towards these efforts, you are making a notable impact on the future leaders in the realm of computer science and software engineering.

Our constant improvement from year to year would be impossible without the support of our corporate sponsors, and for that you have our gratitude.

Again, if there are any questions related to content in the packet or sponsorship, don't hesitate to reach out to our contact information listed above or Jennifer Welton, SCI Director of Corporate Relations, at jwelton@pitt.edu or (412) 389-8915.
